

Smiski

(Decentralized News and Assistant Assistant)

Product Name: Smiski

Category: Decentralized AI-Powered Voice Assistant

Target Market: Investment bankers, quants, and other professionals who need seamless, reliable, and unbiased news while on the go.

Product Description:

Smiski is a voice assistant solution that leverages the power of **Ethereum blockchain** and **Web3** to deliver real-time, unbiased news and perform critical productivity tasks. It integrates with **AirPods or any compatible headphones** equipped with voice assistant functionality (like Siri). This solution provides a hands-free experience, allowing users to manage emails, schedule meetings, get data summaries, and stay updated with global news without needing to engage with a screen.

Key Features:

1. Email Composition:

- Dictate and send professional emails seamlessly through voice commands.
- Automatically generates email content based on context and tone of conversation.

2. Meeting Scheduling:

- Automatically schedules meetings based on user preferences and calendars.
- Ensures no conflicts with other meetings or appointments.

3. Data Summarization:

- Quickly summarizes large datasets or reports for efficient decision-making.
- Provides key insights and relevant highlights for the user.

4. **Unbiased Global News Summaries:**

- AI-powered, real-time news summarization from multiple credible agents worldwide.
- Detects and reports on potential bias or tone, ensuring the user receives **unbiased, actionable news**.
- Updates users with vital information like geopolitical events, market shifts, and global developments that directly impact their work, such as China-related news that may not make it out of the country.

5. **Decentralized News Verification System:**

- Built on the **Ethereum blockchain** for full transparency and security.
- **Smart contracts** validate the authenticity of news articles, ensuring that only verified, credible sources contribute.
- News agents around the world are incentivized with **Ether (ETH)** based on the credibility of the news they supply.

6. **Seamless Integration with User Life:**

- Smiski integrates into the user's daily routine.
- Upon waking up, users can simply ask their connected device (like AirPods), "Hey Smiski, what's going on in the world today?", and receive a personalized, unbiased global news summary.
- Simple mobile app for initial setup and user authentication.

7. **Blockchain User Authentication:**

- User profiles are authenticated and stored on the Ethereum blockchain, ensuring data privacy and security.
- No third-party intervention or data misuse.

8. **Voice Activation & AI-Powered Communication:**

- Voice-activated controls for hands-free operation.
- Smiski understands context, tone, and priorities, providing responses tailored to the user's needs.

The Time-Saving Edge:

One of the key benefits of Smiski is how it frees up the user's time. Traditional methods like reading news on a screen or managing emails and meetings on a phone take up considerable attention and time. When using a screen for these tasks, users are unable to multitask and are confined to just focusing on the task at hand.

However, with **Smiski**, professionals can continue to stay updated and manage their work while going about other activities. Whether it's brushing their teeth, getting ready for the day, or simply taking a break, users can listen to summarized news, delegate tasks, and manage emails and meetings—all without needing to look at a screen.

This allows them to stay productive without sacrificing precious time for other essential daily activities.

Target Audience:

- **Primary:** Investment bankers, quants, C-suite executives, and professionals in business who require fast, accurate, and unbiased news without spending time on traditional screens.
- **Secondary:** Professionals in high-stress environments who need to stay on top of global news and developments while managing their busy schedules.

Competitive Advantage:

- **Decentralization:** Unlike centralized systems that may censor or manipulate information, Smiski leverages the Ethereum blockchain for a truly decentralized ecosystem.
- **AI-Powered News Summarization & Bias Detection:** AI ensures the news is unbiased and summarized for quick comprehension, helping users make more informed decisions.
- **Seamless, Hands-Free Integration:** Unlike other voice assistants, Smiski is fully integrated into daily routines, enabling voice-driven interactions without the need for screens.

Pricing & Business Model:

- **Device Price:** One-time purchase for headphones (e.g., AirPods) paired with Smiski.
- **Subscription Model:** Optional premium subscription for advanced AI capabilities, personalized news summaries, and priority access to new features.
- **Transaction Fees:** A small fee for news verification and reward distribution via the Ethereum blockchain.

- **Ether Incentives:** News agents who contribute valid, unbiased news are rewarded with **Ether (ETH)** for the accuracy and credibility of their content.

Specifications:

- **Connectivity:** Bluetooth (for seamless connection with AirPods or any compatible headphones).
- **Battery Life:** 12 hours of continuous use, with fast charging capability.
- **Design:** Lightweight, ergonomic design for comfortable wear with noise-cancellation features for clear communication.
- **Compatibility:** Compatible with mobile phones for initial setup (Android & iOS), with the assistant operating independently thereafter.

Branding & Positioning:

- **Brand Name:** Smiski
- **Tagline:** "Your unbiased, decentralized assistant—anytime, anywhere."
- **Positioning Statement:** Smiski is the first fully decentralized, AI-powered assistant designed for professionals who need unbiased, real-time global news and effortless work management without screens or distractions.

Use Cases:

- **Investment Decisions:** Get real-time, unbiased news and insights while analyzing market trends, all without leaving your desk.
- **Time Management:** Automate scheduling, meeting management, and email writing, reducing stress and increasing productivity.
- **Travel & Global Awareness:** Stay informed about important news happening globally, even in regions where news might be hard to access.
